### PROJECT

#### Online Aution System | 2024–2025

The Online Auction System is a web-based platform designed to facilitate online bidding between buyers and sellers. It allows users to register, list products, and participate in auctions in real time, with the system automatically tracking and updating the highest bid until the auction closes. The project includes secure user authentication, product management, bid tracking, and winner selection modules to ensure transparency and fairness. A user-friendly interface was developed for seamless navigation, while efficient database management was implemented to handle user and auction data.
